

Ratepayers' Meeting Passes Off Quietly

There Was a Good Attendance But No Fireworks

Although there was a good attendance at the ratepayers' meeting held last Friday evening the meeting passed off very quietly and all appeared to be quite well satisfied with the reports given by the chairman of the various committees.

Mr. P. Lavelle was chosen to act as chairman. After explaining the object of the meeting and that this was the time to ask questions He felt sure the councillors and school trustees would welcome constructive criticism, and would be glad to hear of any complaints or suggestions.

Mayor Worts was then called upon. He said there was not much new to report since the business of the council had been fully reported in the Review from time to time. He thanked the members of the council and the ratepayers for the co-operation and forbearance that had shown towards him during his term of office. He then drew attention to the auditors' reports which are distributed in the hall and said if there were any questions any one wanted to ask he would endeavor to have them answered. References were made to the number of properties the council had disposed of during the past two years; all of which were now back on a tax paying basis. Because of this income from taxes would be slightly more this year than last, despite the fact that the town was not receiving taxes from the old rolling mill which was moved away from town. The water department, he said, had always shown a deficit, and the only way to remedy this was to raise the water rate. The council did not think this advisable at the present time. However he said that the revenue from the water department was larger this year than ever before. The Mayor stated that the council had kept well within its estimates for the year except in the Health and Relief department and that this was a matter over which the council had no control.

The chairman of the several committees also reported each saying that they had kept well within their estimates, except in the case referred to by the Mayor. Each felt that the town's affairs were being run as economically as possible and that all the councillors gave the town's business the same careful attention as though it were their own.

Mr. A. Learmonth, chairman of the school board, was next called upon. He said that during the year the board had worked harmoniously together in the running of the school. They had only a few minor complaints from any quarters and these were quickly and easily remedied to his satisfaction at all on general. Owing to the congested condition of the school during the year the board found it necessary to engage another teacher. This had greatly improved conditions as now only two rooms were teaching two grades in the public school. He said the board had kept well within the estimates for the year except for the garbage caused by the sewerage, a matter the board could not control. On the whole

Next Attractions At Cameo Theatre

No more ideal play for the gifted talents of Miss Clara Bow has ever been chosen than her latest vehicle, "The Wild Party," which comes to the Cameo next Monday. This is a vivacious fast-moving production based on the story by Warner Fabian, famous author of popular novels of the jazz age. There are several real wild parties in the play and their watchword seems to be, "When better whoopee is made, Clara will make it."

On Thursday next Tom Mix will be seen in "Silly High." Tom needs no introduction to patrons of the Cameo. His pictures are always full of thrills and his one is no exception. It is said to be one of his best. There will also be good comedies.

Preston Martin, of Bessano, spent last week and in town visiting his home here.

Mrs. D. Kerr, sr., left this week for Vancouver where she will reside for the next year.

however, they were slightly under the total estimates. He assured the meeting that the Board had done its best to give ratepayers, the pupils and the teachers the best service possible with the funds at its disposal.

Before closing both the Mayor and the chairman of the School Board reminded those present of nomination day on the following Monday and urged them to be on hand to see that candidates were secured to fill the several vacancies on both the council and the board.

On motion of Messrs. A. N. Lillard and E. L. Stone a vote of thanks was tendered the Mayor, Councillors and Trustees for services rendered during their term of office. The Mayor also thanked the Review for publishing the minutes of the council meetings. The meeting closed with the National Anthem.

Football Meeting

The annual general meeting of the Redcliff Football Club was held in the Legion Club on Friday evening, Feb. 12th, at 8 o'clock. Election of officers and other important business. All interested are requested to attend. A. J. Learmonth Pres.

Local Items

Miss Jean Waters, of Vancouver, arrived in town this week to visit her sister, Mrs. G. Myers.

Lieut. A. Osgood leaves early next week for Vancouver to attend the Military School of Instruction.

At the recent I. O. O. F. district meeting in Medicine Hat, A. Statten of Redcliff, was elected D. D. G. M. for the district.

Mr. Rankin, of Wallaceburg, Ont., arrived in town this week to supervise the installation of some new machinery in the glass plant here.

Robt. Thomson, who has been spending the winter here, left last Saturday for Tilley where he has secured a position on the C. P. R. farm there.

Miss Lilian McDermott, who has been in "Houlihan" for the past few years with a fish class concert company, is expected to arrive home in Redcliff this week to visit her parents.

Mr. John Whitlock, a pioneer of the Suffield district, died at his home near that town, last Monday, at the age of 88 years. Besides his widow, he leaves a family of married sons and daughters. The funeral took place in Medicine Hat on Wednesday afternoon at 2.30.

Miss Beatrice Tenter was hospitalized at the Medicine Hat hospital last Monday morning suffering from an infected arm, the result of an accident. Her condition is not considered serious.

OBITUARY

Donald James Kerr, (Catholics) the second son of Donald James Kerr, Bellevue, son of Mr. and Mrs. David Kerr, was held at their residence 355 Dominion Street, Medicine Hat, at 1.30 on Saturday, Feb. 1st. Rev. Leo conducted the service. Little Donald, one year and three months, died very suddenly of pneumonia on Jan. 31st.

Little eyes are smiling, Little feet are still, But God's angels watch o'er him Whom we all love so well.

Funeral services were received from the following:—Heart, Mr. and Mrs. D. Kerr; West, Mr. and Mrs. A. Hosie and family; Sprays, Canadian Legion Pipe Band, Mr. and Mrs. Colpitt and family, Redcliff, Mrs. W. Dodds and son, Mr. and Mrs. Downing and family, Mr. and Mrs. D. R. Gillespie, Mr. Alf Hsieh, A. Reid, Mr. Fisher, Miss A. S. Holmes, Mr. Kerr and Mrs. Memorial Hall Sunday School, Mr. and Mrs. Walter Slater, Dorothy Smithson, Mr. and Mrs. A. T. Blair and Agnes McCaslin, Mrs. Wain, Howard & Evelyn Waters, Redcliff.

Fish and Chip supper, Friday, Feb. 21st at Parish Hall, served by St. Ambrose S. W. A. Tickets 50c.

A very pleasant time was spent at the home of Mr. and Mrs. Scammon on Saturday afternoon when a number of ladies gathered and gave them a real surprise, the occasion being Mrs. Scammon's birthday. The ladies presented Mrs. Scammon with a very nice gift accompanied by best wishes. Mrs. Scammon's wishes were drawn by each on slips of paper, creating much merriment, especially the fortune drawn by "Miss Host." It was of a social nature. A most delightful lunch was served including a birthday cake. All felt that they had spent a most enjoyable afternoon at Mr. and Mrs. Scammon's and all that can be desired as host and hostess.

Election for Councillors Here Next Monday

Four Candidates in The Field and Three to be Elected

There were a few more that usual at the Town Hall last Monday morning for nomination day. When the hour for closing arrived Returning Officer, Mr. Wm. Henderson, made the following announcement: There being only one nomination for the office of Mayor Mr. J. H. Worts, the present Mayor was declared elected for 1930 and 1931 by acclamation.

Nominations for councillors were as follows:

A. Brydie, nominated by G. H. Worts and F. Skidmore, H. Champ, nominated by A. Brydie and G. H. Worts, H. M. Sauerstein, nominated by W. Campeau and R. Cann, A. E. Shaw, nominated by G. H. Worts and R. G. Lauber.

As there are only three vacancies to fill Mr. Henderson declared that unless one of the candidates withdrew within the specified time an election would be held in Cliff Hall on Monday, February 10th from 10 a. m. till 7 p. m.

The following were nominated for the School Board:

A. J. Learmonth, nominated by H. Champ and H. M. Sauerstein, R. C. Hargrave, nominated by A. J. Learmonth and A. Brydie, R. Marry, sr., nominated by A. Brydie and P. Campeau.

As there were three vacancies to fill, these three were declared elected by acclamation.

The only election, therefore that will be held this year will be for councillors. This will be the first election we have had for town councillors for the past ten or twelve years. It has also been said that long or longer since we have had an election for school trustees.

Of the candidates in the field or councillors Messrs. Brydie and Champ have served on the council continuously for the past eight years. During that time they have gained a wide experience in town affairs and conditions. The other two, Messrs. Sauerstein and Shaw, are making their first appearance in the municipal field. Both are young men who have had executive experience in other organizations.

Being the fifteen months old son of Mr. and Mrs. Dave Kerr of Medicine Hat, died suddenly last Friday from an attack of pneumonia. The funeral took place on Saturday.

Electors Must Vote For Three Candidates

Otherwise 21st Will Be Spoiled And Will Not Be Counted

Next Monday the electors of the town will be called upon for the first time in twelve or thirteen years to vote for councillors to represent them on the council. There are four candidates in the field with only three to be elected. Those who are entitled to vote in this election are all property owners and tenants and their wives, sons and daughters; and all who pay the service tax. In all cases the voter must be of the full age of twenty-one years and their names must appear on the last revised voters' list, having been placed there at the proper time as prescribed by the Town Act.

All voters "MUST" vote for three candidates or their ballots will be spoiled and not counted. The usual system of making an X in the blank space opposite the name of each of the three candidates of your choice, will be used. The poll will be held in Cliff Hall and will be open from ten o'clock in the morning till seven o'clock in the evening with Mr. Henderson officiating.

At three about 700 names of the voters' list the returning officer will be kept busy during the day. Those who can converse English so would greatly help in voting early and not during the rush at meal hours.

The Great West Festival at Calgary

Picturesque costumes, pretty girls, clever dancers, marvelous exhibitions of native handicraft will be among the attractions given to the public at the big folkdances, folk songs and handicrafts festival scheduled to be held at the Palliser Hotel, Calgary, March 18-22 next. A score of nations whose people have come over to the Dominion to attend the number of West Indians in the West will show the treasures of their nationalities during the centuries of their national history and Canadian culture will be given an impetus from the

source which has always been the almost of great art. This Calgary festival is the third of similar ones held at Winnipeg and Regina, and the first two proved so successful and awakened such interest that Premier Brewster of Alberta asked for their repetition this spring. They are organized by the Canadian Pacific Railway and the coming one is also in connection with the Canadian Handicraft Guild, Alberta Branch. Last year's show, top picture, group of Polish dancers; lower right, Irish Celtic in costume; lower left, Hungarian girl posed against platter of Hungarian make.

No Christmas In Russia

Soviets Determined To Emulate All Symbols of Christianity

Sovietized Russia is having a much trouble with Santa Claus as the United States has with bootleggers. Santa, you know, besides a number of other extraneous and distasteful elements, has become the bootlegger of Russia. That's the only way he can go down a chimney in Moscow—successfully.

The traditional Christmas celebration in the Union of Soviet Socialist Republics involved as much bootlegging as the traditional way of lubricating the celebration in the United States.

The police promised to arrest anyone cutting fir trees or transporting or buying the same during the Christmas season—of which, legally, there is none in the Lenin utopia.

Both the state and co-operative stores of Moscow, place themselves to not sell Christmas toys, or arrange Christmas windows or other exhibits even faintly fragrant of Yuletide cheer during the holidays. Moreover, they promised to destroy all stocks of St. Nicholas or other surviving symbols of the holiday, which commemorates the birth of Christ and that of Christ, and which the Soviet is determined to eradicate.

The workers, instead, were expected to contribute the salary they can on Christmas Day to the fund for industrializing Russia, and any absences on that day had to furnish an excellent excuse.

Every cinema, every theatre gave an anti-religious play on Christmas Day. Children and adults were taken to anti-religious museums for lectures against the holiday—its tradition.

Through the athletic campaign proceeds the round, it comes to a climax at Christmas in order to eliminate all surviving religious customs in Russia.

The artist-Union threatens to expel all members singing in churches.

Milk Cheaper In Canada

B.C. Government Finds That Milk Is Sold Here Cheaper Than In U.S. Cities

An investigation conducted by the British Columbia Government into the price at which milk is sold to consumers in cities in Canada and the United States indicates that the latter have a considerable advantage to the Canadian buyer.

Winter prices in Canadian cities range from 14 to 14 cents per quart of 40 cents; in American cities the range is from 12 to 17 cents per quart of 32 ounces. Allowing for the difference in size of the Canadian and American quart this most essential retail price of this most essential food item is at least 25 per cent. lower than in the United States.

Notwithstanding the lower retail price for milk in Canada, it is contended that the Canadian farmer receives a better return than the price paid on account of reduced costs of handling and distribution. Cost of production is also held to be lower due to artificiality to the smaller investment in land.

Individual Daylight Saving

Workers in Berlin, Germany have adopted their own daylight saving plan. In order to enjoy outdoor life this summer, many citizens are starting to work not later than eight o'clock in the morning and leaving the office at four in the afternoon. So many are following the plan that streets are filled with them between seven and eight o'clock every weekday morning.

Bulls First 'Vase'

As far back as 1842, W. S. Henson, of London, England, designed a heavier-than-air flying machine. It is claimed that Henson applied for a patent on his model, known as the "Aerial Steam Carriage," but that the working plan was never completed. Springfield, who constructed the first motor-driven model aeroplane now in the Science Museum, assisted Henson.

Voices (on telephone) "Oh, please tell the doctor to hurry round as once—my little girl has swallowed a needle."

Maids: Well, the doctor is very busy just now. Did you want the needle at once?

"But she is stupid—the other day she hadn't a key to open a tin of sardines."

"I?"

"She sent for a bookmillin." Pages Gaien, Verdun.

Important Findings

In Bovine Scourge

Banishing Research Committee Reports Progress In Dealing With Foot And Mouth Disease

The "Foot and Mouth" Empire says: "New and important findings in regard to the dreadful foot-and-mouth disease are reported by the Banishing Research Committee following two years of exhaustive study. Results of the study are made public in a progress report just issued by the committee.

For years the foot-and-mouth disease has been a source of bewildering loss to cattlemen, but only on this continent but in Europe. Only a few years ago the British Government carried on an extensive inquiry to determine causes and find curative, restrictive methods.

While Dr. P. G. Baillie was visiting England, two years ago, the facts disclosed by the British inquiry were brought to his attention. On his return, Dr. Baillie was thought of an experimental method which resulted in some revelation on the peculiarities of the disease. He interested Miss A. Cowan, a thoroughly trained research worker in the field of bacteriology, in the problem.

"Miss Cowan found the original method suggested by Dr. Baillie too difficult to greatly evolve. Her own method which has proved highly successful. Incidentally while continuing her experiments she met Prof. T. H. Maitland, of Liverpool, and following her marriage to him and the successful results of her experiments, she came to Canada for England, where she now resides.

Mrs. Maitland found that when the foot-and-mouth disease is transferred to their feet, pigs continue to develop in the hairy skin. By rubbing the floor of the animal pen with a solution of the virus, if it was subjected to pressure. She was able to show further that if a guinea pig was pressed from the back by wrapping it in cotton, lesions did not develop on the protected skin. This proved that there was no opportunity of the hairy skin but that the lesions develop on the foot owing to its use.

Prof. T. H. Maitland, of the Banting Research Committee, is of the opinion that the findings of Mrs. Maitland are of much value."

The Coppermine River

Owen Its Name To Deposit Of Copper Found In Its Vicinity

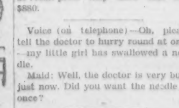

Coppermine River, which flows into the Arctic Ocean, owns its name to Saml Heine, the first white man to reach it. For many years prior to Heine's visit to the river in 1771, the Indians who frequented the trading posts at York and Churchill on Hudson Bay had excited the curiosity of the white men by their tales of wonderful copper mines near the river, and by the samples of the metal which they displayed. Heine discovered the "mines" as he called the beds of rocks and gravel and about 20 miles S.E. of the mouth of the river.

The first reference to the river by any name, known to the Geographic Society, is in a letter written by which Captain James Knight kept at York Factory, 1716, in which he refers to "the Copper River."

The first published reference to the mines occurs in a book written by a Canadian, Nicolas Jeronim, who published an account of twenty years' residence on Hudson Bay. In 1720, He states he had seen the copper very often as the natives always brought some back to York Factory, when they went to war in the north.

Made Of Matches

Built entirely of matches, Herr W. Lemperly, of Osnabrück, Westphalia, has made an exact model of New York Cathedral. The building has a length of 17 feet, and a breadth of 6 1/2 feet, while the tower which contains the clock, also made of matches, is 19 1/2 feet high. During the seven years he had worked at his hobby Herr Lemperly has separately glued and laid 6,000,000 matches. If he has purchased the cheapest type of matches at retail price they have cost him \$600.

After being champion pugilist of England, one John Gully, entered politics and became speaker of the House of Commons, holding this position 20 years.

Hickletons three inches in diameter often fall during storms in India.

Popularity Of Radio

Increase In Radio Licenses Testifies To Widespread Use Of This Modern Instrument

Dividence of the growing popularity in Canada the radio is given in recent official statement to the effect that in the first seven months of the present year, 1929, 10,000 more licenses had been issued to 240,000 persons compared with the number issued in the corresponding period last year. Though radio broadcasting was introduced to the world only nine years ago, it is now regarded as practically a necessity by many people. No modern invention has proved a more beneficial factor in helping to solve the problem of communication. Radio in the rural districts of Canada, especially in the more sparsely settled areas, are the medium of providing the latest market reports, up to the minute news, and programs of music and entertainment. The settler on a home-stead or isolated farm may, if he has a radio, tune in on whatever program he fancies from the wide variety offered daily and nightly. The pleasure of a family enjoying the radio in Ottawa or Toronto or by the Broadway star in New York is no more remote from him than from the retailer in the city.

The radio is proving a very practical auxiliary in helping to settle the 240,000 acres of arable land in Canada that still await the plough.

Poultry Flock Improvement

Careful Breeding and Selection To Build Up High Production Flock The poultry flock of the Cap Rouge, Quebec, experimental station, has, by careful breeding and selection, been built up to a high state of production. The superintendent of the station in his report for 1928, published by the Department of Agriculture, at Ottawa, states that trap-netting was commenced about thirteen years ago when only four hens were found in the flock. Since that time the flock has grown to one hundred and fifty eggs in a year. While not more than one dozen birds have been brought into the flock since that time, the flock has increased by more than one hundred hens with yearly records of more than one hundred eggs per hen.

Only eggs from the high layers and mated with males of high producing ability have been used for breeding each year. Breeding, however, Mr. Langstaff, the superintendent of the station, is not everything in effecting flock improvement. A careful breeder will find it necessary to give attention also to such matters as early maturity, non-brooding, and high resistance to laying.

While trap-netting alone may single out a good producer, the superintendent has found by experience that a careful analysis of records is necessary to find out the good producers that may be depended upon with some degree of certainty.

A Generous Reward

Vance Free, of North Manchester, Indiana, is an honest man, but it didn't pay so well recently when he found a money bag among some mail sacks here. He learned that the money belonged to a clerk in his car and turned the money over to him. In mid words of praise the clerk thanked Free and intended to accept a reward. The reward turned out to be a nickel.

Manitoba Livestock Associations Manitoba livestock associations will hold their annual convention in Brandon on January 6th, 7th, and 8th. The meetings will precede the convention of the United Farmers of Manitoba, thus assuring a large attendance.

IS PLANT EXERT

Holly Used As Medicine

Berries Once Thought To Be Antidote For Poison

The "holly bush" with which we decorate our homes at Christmas time, is a native of the south-eastern United States. In the former climate the bush has been known to attain a height of twenty to thirty feet, whilst in the latter it is generally only a small bush.

In some places holly is used as a medicine for cases of gout and rheumatism, while the leaves and small branches, chopped in small pieces, are sometimes given to sheep in severe winter weather.

The wood is greatly in demand for making musical instruments and handles of tools.

The word "holly" is derived from the very ancient custom of using sprigs of this tree to decorate the churches at Christmas time. This gave it the name "Holly Tree," which in the course became known as "holly tree."

Long ago holly was thought to be an antidote for poison and a protection against lightning, and it was believed that the flowers of holly would cure the scurvy.

In Persia and India the bark is often soaked in water and the faces of newly born children are washed with the liquid as a charm.

In some parts of Ireland the holly is regarded as the special tree of the fairies.

Used Nearly Half Century

Umbrella Owned By Plainfield N.J. Man, Has Had Remarkable Career

How old is your umbrella? Mr. Goodwin, of Plainfield, N.J., has had his umbrella for 53 years. Ernest R. Ackerman, of Plainfield, N.J., has had his for 49 years. It is suggested that Mr. Goodwin's umbrella constitutes a record for faithful service, and, if not for that, for the homing instinct, for it has been lost and returned four times. This elderly possessor of an umbrella, then, awaits challenge.

Apart from its having been used the world with Mr. Goodwin, and its American origin, this umbrella's history is a record of faithful service. Mr. Ackerman's, however, has a career which, apart from its age, is as open (and shut) as any other.

It always accompanies its master in sunshine or rain. It has survived 72,000 miles of globe trotting, has crossed the Atlantic 16 times, was in a blizzard and a Spanish earthquake, and evaded the clutches of rain robbers in Arizona, in 1885.

Next year, when it will have done half a century's good work, Mr. Ackerman is going to present it to the Plainfield public library, where a brass plate, suitably inscribed will record for all time its devotion to its owner and the owner's special loyalty to it—there is no more to be recovered only a price—London Express.

The Lowest Ring

"Young Jim Peterson asked old man Smithers for his daughter's hand. The old man said rather anxiously: "I don't understand your working at the First National Bank. Can you give any chances of promotion?" "Have I?" said Jim Peterson, and he laughed confidently. "You bet I have! Why, except for the office boy I hold the lowest position in the firm."

Our Versatile Prince

While knitting as pastime for men has gained popularity in England lately, it was learned with surprise that the Prince of Wales had taken it. These news were hailed by the Prince are exhibited at the display of Queen Mary's London Needlework Guild, with three others done by Prince George.

A Tale Of Courage

Experiences Of Group Of Immigrants In Early Days Of Alberta

In 1887 there arrived at Edmonton a group of immigrants from Bohemia, which is somewhere in Rumania, which is in Europe. They were told to go 80 miles north-east of Edmonton. There was no railway, so they spent most of the winter in the lumber wagons and the trek began.

The document to that story is in the current Canadian Red Cross Journal, and it is told by the children of the children in three wagon, told by the Red Cross organization of the school, and only as a vague folk tale. They are sending it back from the Canadian village of Hain, Alberta, to the namesake village in Bohemia.

"Having got their land," relates the story, "they had no other means than all the required tools, but they made the best of what they had. The homes were very roughly constructed and covered with straw. They had few windows and only one small door."

They were roughly constructed and covered with straw. They had few windows and only one small door. They were roughly constructed and covered with straw. They had few windows and only one small door.

CANADIAN FISH EXPORTED TO EVERY CLIME

EXPORT MARKETS FOR CANADIAN FISHERY PRODUCTS

In no form of natural wealth is Canada more richly endowed than in respect of fisheries resources. The fisheries of the Atlantic and Pacific coasts, and of innumerable inland waters, form the foundation of a great and widely extended industry, and are one of the most important and important pillars of the Dominion's export trade. In the last few years Canada's exports of fishery products have averaged rather more than \$20,000,000 a year, and this trade penetrates every quarter of the globe. Canada's customers for fishery products of one kind or another include nearly a hundred countries, and the above map gives some idea of how far they are scattered.

British United Press is reliably informed that Ludwig Kienelwacher, formerly Austrian consul in New York, has been appointed to represent Austria at Ottawa.

Every one of the 43,000 votes cast in the recent civic elections in Winnipeg, will be carefully examined by a commission investigating legal and illegal plural voting.

Little probability exists at the moment that legislation will be introduced at the coming session of parliament for payment of rations to prisoners serving time in Canadian penitentiaries.

Cruiser cars equipped with radios may be adopted by the Montreal police department in the near future. Detroit and many other American cities have already established this service and Montreal may follow their example.

A delegation representing the Federated Association of Letter Carriers waited recently upon Hon. P. J. Vrain, postmaster-general, to interview him regarding salaries and working conditions of workers in the postal service.

The World's Poultry Congress

Canada To Take Important Part In Congress To Be Held In London, England

Preparations for the fourth World's Poultry Congress, which will be held in London, England, in July, 1930, are well in hand. Canada will take a very important part in this Congress. The Dominion is fortunate in being represented in poultry matters, Mr. P. C. Eider, the Dominion Poultry Husbandman, who is the president of the World's Poultry Science Association, under whose auspices congresses are held.

Mr. Eider recently concluded a tour of the countries in Europe and the near east, and has returned with the assurance that the great nations of the world are preparing to make exhibits and participate in the presentation of papers on poultry topics.

The London Congress, like the one held in Ottawa, in 1927, will include a livestock exhibit in which hundreds of varieties of fowls and rabbits will be displayed. Canada's exhibit in this section will include several hundred head. The national exhibits for Canada are being prepared by the Federal and Provincial Departments of Agriculture. The purpose of these will be chiefly to illustrate the part being played by education, research and economics in the development of the poultry industry.

The Congress will last, for a full week in which five sessions will be held simultaneously. In these sessions papers will be presented and discussed on breeding and incubation, nutrition and rearing, diseases and their control, economic including marketing, sanitation. An elaborate program of excursions and entertainments is being provided for the delegates, a large number of whom it is expected will be from Canada.

Alberta Clay Products
The Alberta Clay Products Company, Medicine Hat, is reported to have sufficient orders in sight to keep the plant fully employed for the next twelve months. It is now running a day and a night shift.

Next to grape wine it is said that Japanese sake, or rice wine, is the oldest alcoholic beverage known to man. Its use dating back over 2,000 years.

A twelve-cylinder automobile attracted much attention at the recent automobile show, at Paris, France.

Prevention Of Colds

New York Doctor Gives Ten Rules To Follow

In November there were 400 deaths from New York from pneumonia, and 23 deaths from influenza, and the city health commissioner, Dr. Wyne, has broadcast some general advice to citizens, advice which is probably as good anywhere as in New York.

Dr. Wyne set forth 10 rules for preventing colds. These are:

1. Get plenty of nourishing food.
2. Drink plenty of water; bathe frequently.
3. Sleep eight hours each night.
4. Breathe deeply while in the open, but through the nose.
5. Make certain that your home is well ventilated.

6. Make certain that the air is not only fresh and of the right temperature, but that it contains moisture.

7. Dress according to the weather.

Do not permit yourself to chill.

8. Avoid using other's towels in homes where there are colds.

9. Keep away from persons who have colds.

10. If you contract a cold, go to a doctor. Don't resort to nostrums.

After all even the best advice is merely the application of common sense as stated above. A good deal of ailment in the winter is caused by defective ventilation and overheating.—St. Catharines Standard.

FLYING MOVIES ARE LATEST THRILLS FOR TRANSCONTINENTAL TRAVELLERS

Cloud Chinas Made Possible By Symposium Of American Scientific Geniuses

American inventive genius in the laboratories of several of our largest corporations recently joined hands to make a Jules Verne dream come true.

Only a few years ago anyone who predicted that we would have flying theatres would have run the grave risk of being rubbed to the observation ward of the nearest asylum.

Yet the flying movies are here. Within the last two weeks this miracle of modern science has been perfected and regular passengers bound from coast to coast in 48 hours are witnessing motion pictures above the clouds.

The miracles reputed to the ancient magicians seem insignificant when compared with the fact that you may now lounge comfortably in your big armchair, watching a complete motion picture show while flying over the tallest peaks of the Rockies.

Meticulous scientists, working in isolated and unexcited laboratories, have made possible this really astounding achievement. The Edison Lamp

Recipes For This Week

(By Betty Barclay)

CREAM CARAMELS

- 1 cup table sugar.
- 1 cup cream or rich milk.
- 1 teaspoon vanilla.

2 cups granulated sugar.

Mix together the sugar, the syrup and half the cream, and bring slowly to the boiling point, stirring well. Cook until the mixture will form a soft ball when dipped in cold water. Then add the remaining cream and cook again until the candy forms a hard ball when subjected to the water test. Flavor with the vanilla and pour into a buttered pan. Do not stir the candy more than is necessary during the cooking, as stirring will cause the sugar to granulate.

OATMEAL DROP CAKES

- ½ cup butter.
- 1 cup sugar.
- 2 eggs.
- ½ cup milk.
- 2 cups rolled oats.
- ½ cup flour.
- 1 teaspoon baking powder.
- ½ teaspoon salt.
- 1 teaspoon cinnamon.
- 1 teaspoon nutmeg.
- 1 cup chopped seed raisins.

Cream butter, add sugar, eggs and cream, mix thoroughly. Mix sifted dry ingredients. Add four measure to first mixture, thoroughly mix. Drop by spoonfuls on a greased baking pan and bake in a rather hot oven. This makes 32 to 36 cookies.

What a Billion Means

Nice Little Problem To Work Out In Spare Time

It is just as easy to say billion as million. The word has been spoken frequently and familiarly during the recent affair in Wall St., and a public grown used to large figures, hasn't been so much impressed.

Charles Hanson, lumber man of Minneapolis, Tenn., turned the microscope of practical imagination on a billion dollars and dramatizes it. Here is how it figures out:

If a billion had been accumulated 500 years before Christ, had not been allowed interest, and had been paid out at the rate of \$1,000 per day every day since, up to and including November 21, 1929, there would still be \$115,860 left.

If you don't believe it, figure it out for yourself. And don't forget the leap years.

The Meaning Of Liberty

Freedom Only Comes When Conquest Of Self Is Complete

There is no word in human language which so charms the ear as liberty. There is no word which so little pains have been taken to define, or which is used to excuse so many of our faults. There is a liberty of the child or the savage, the liberty of animals, the vagrant liberty which obeys no restraint because it is conscious of no obligation. There is a liberty which arises from the subjugation of self and the control of circumstances, which consists in knowledge of what ought to be done, and a power to do it derived from patient labour and faithful discipline. The artist and the artisan learn under the guidance of masters to conquer the difficulties of their work. When the conquest is complete, they have freedom, the freedom known only to perfect service.

It is so with life as a whole, and with the occupations into which life is divided. Only those are free who have patience to learn the science of a useful and honorable service, who have overcome their ignorance and weaknesses so as to have become masters of themselves, and reaped abundant harvests in fields cultivated with conscience as well as diligence.—James Anthony Froude: The English in Ireland.

A Good Suggestion

Time Would Be Saved If Farms Were Numbered

Residents of the cities have their houses numbered, why not apply the same principle to farms, says George F. Gorman, of Sanguin, in a letter to the Edmonton Chamber of Commerce. Gorman suggests that in order to facilitate the finding of farmers by strangers to the district, a sheet of about two feet square, be placed along the road in front of every farm house, with the farmer's name, that of his next neighbors, and the direction and distance of his neighbor. Mr. Gorman believes that this simple expedient would save a great deal of trouble and facilitate travel on rural roads which have not been marked. The man is right.—Brandon Sun.

Dry Ice

Is Made From Carbon Dioxide and May Soon Replace Natural Product

"Dry Ice" made from the soot of factory smokestacks and the exhaust of automobiles, was suggested as a possible substitute for natural ice by George B. Bright, ice manufacturer of Detroit, in addressing the third session of the National Association of Scientists at New York City. "Carbon dioxide," which is manufactured from carbon dioxide, is being produced in small quantities. Mr. Bright said, and only awaits further research and developments to become a possible substitute for ice in the home, it is at present chiefly used for refrigeration cars and ice cream trucks.

Nearly 100 sculptures are now employed in carving works of art at the Loughborough factory in Italy.

Britishers Interested

In Warmer Homes

Manufacturers Unable To Satisfy Demand For Radiators and Radiators

The recent severe winters in Britain, the strain put upon their style of plumbing and unusual accidents from freezing within the house seems to have caused the hardy Briton to consider more efficient heating services. In London, Hilbert and Britons who saw a fire well warm all winter, or, at any rate, they didn't. The picture shows that the demand would over there. We would demand, winter heat—and now so does John Bull. It seems. The Ottawa Trade and Commerce Department reports that during the past few months there has been an improved demand for radiators and boilers, and home manufacturers have been unable to satisfy the demand and deliveries are being delayed from six to eight weeks. One well-known American manufacturer of radiators and boilers are putting down, through their United Kingdom organization, the necessary plant for the production of their radiators. In Sweden, the manufacturers are attempting to market a range of lightweight radiators, which are made of cast iron and steel boilers. Several Canadian firms have already tried to enter the market, but there appear to have been such a quickening to interest in central heating as this year.

Has Private Army

Duke Of Atholl Allowed To Keep Armed Retainers

The only British subject permitted to keep a private army has celebrated his 53rd birthday. The man who owns his own armed forces is the Duke of Atholl, holder of 19 titles. The Duke's retinue of armed retainers, a picturesque survival of feudal days, is an officially recognized force. Queen Victoria once presented colors to the army, numbering about 300. All the members of the Atholl Highlanders served in the World War in the Scottish Home.

Technical High School For Moose Jaw

The Saskatchewan Government has expressed its willingness to contribute one quarter of the cost of constructing a Technical High School building in Moose Jaw, at a cost of about \$450,000. It is believed that there would be between 100 and 200 students ready to enroll at once.

Traveller (to porter): "How long will the next train be?"

Porter: "Engine and six carriages." Traveller: "You're smart, aren't you?"

Porter: "No, sir. Smart's gone 'ome for 'is dinner."

Japan produces more feature motion pictures than any other country, according to the U.S. Department of Commerce.

The Chinese calendar is traced back to 2500 B.C.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease.

Science has further established that radiation of light does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital life-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-felt need. Extensive experiments have conclusively proved that it is a most powerful source of Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and children and on the well-being of cattle, enabled for the first time to have the full benefit of the sun's rays in their stables.

Indeed, the science of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-producing capacity and fertility of chickens, has greatly improved the health of cattle, and has been long used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light last strong windows for cattle sheds, dairies, stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, nurseries, beds, plant coverings and greenhouses. It keeps out cold and wind, while it lets in the maximum amount of actinic rays, is easy to fit. **WINDOLITE** is supplied in rolls six feet wide and in widths of 36 inches only. A square yard of **WINDOLITE** weighs about 14 lbs., and a square yard of glass of ordinary thickness, weighs about 150 lbs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, Ex. Tax, Toronto.

Use **WINDOLITE** and let **YOUR PLANTS YOUR CATTLE YOUR CHICKENS YOUR CATTLE** Bask in the sunlight Send for booklets "WINDOLITE"

The Singing Fool

By HUBERT DAIL
Copyright, 1922, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing star at Blackie Joe's New York night club, is loved by Grace Farrow, but he doesn't know it. He marries Molly Winslow, a local singer, and with her, and the power of popular songs. When their baby, Junior, is about two years old, Molly drops with John Perry, Al's best friend. She and Perry take the child, but Al does not when he visits his Blackie's place, Grace Farrow, now assistant manager, makes him know that he will bring a comeback. After that night Al's future, he leaves Grace, promising to come back. After he plays Al's future, he leaves Grace, promising to come back. After he plays Al's future, he leaves Grace, promising to come back.

CHAPTER XXVII

A few moments later a figure came rapidly around Grace's desk and stood by her side, where she was stilled by the screen from the view of the crowd. It was Al—In new clothes, but with the old smile. As she rose his arms went round her and his mouth pressed against her own. It was the first real kiss he had ever given her!

With Al's arms still holding her close, Grace looked up into his face with an expression in which joy and wonder were mingled. She had dreamed of this hundreds of times, but always believed it would not possibly come true. Now that it had come true it seemed almost unreal, because it was so closely associated with those long-ago dreams. Yet the arms about her were certainly real, and Al's kiss had the thrilling reality that never comes in a dream.

"Dear little Grace," he whispered. "I've been thinking of you all day—seeing you as I left you, standing in the Square, waving to me. I'm late—I do you think I wasn't going to show up?"

"I knew you would come," answered Grace softly. "I've always believed in you and I believe in you now more than ever before."

"There was a sound on the other side of the nearby door and a waiter entered, on his way to the dining room from the kitchen, just as Al released Grace. But the waiter saw the tall-tail movement and could not hide his astonishment. This little feminine assistant manager had a reputation around Blackie place for coolness and aloofness."

"Well," said Al, when the waiter had passed on, "I must find Blackie and tell him what you've done for me. I think he'll be astonished at this quick change."

Al glanced down at his new blue serge, double-breasted suit with pinstriped pants. Then he struck an attitude, holding his brow forward in front of him in a burlesque pose, as if he were ready to be photographed.

"Look me over, Grace! How am I?" "Splendid!"

"Well, if you say so I must be good. I have some new evening clothes, too, but I'm holding them for another night. No use dazzling you too much at first."

Grace laughed easily at the smiling manager, but behind her smile she was studying him closely. He was a

Filming Indian Life

Metropolitan Will Preserve Images and Customs of Aborigines, of the Plains

The chiefs of the Blackfoot Indian nation, who are the preserve of the motion picture which are being taken of their tribe for the National Museum, are now being filmed by H. Gooderham, Indian Agent to the Indians, who has written to this effect in a letter just received at the Museum.

The Museum archaeologist visited these Indians for nearly a week in October, 1922, and took some 800 feet of motion picture film but, as the Sun Dance is given only in summer, he would not take that, the most interesting ceremony of any plains Indian tribe. He again visited them for six days in October last, securing many specimens, but no motion picture film, as his allowance of film for the season had long been exhausted. The chief invited him to a fine house for a ceremonial but, having no film for the purpose, he went elsewhere to buy specimens for the Museum.

The chief, according to Mr. Gooderham's letter (dated December 8, 1922), approving of the National Museum taking pictures even of the Sun Dance. "Seeing is believing" with the old Indians states Mr. Gooderham, who goes on to state the Museum postcard showing exhibits to place, which was sent to him to show to the Indians, "will do much to make clear" the Museum work and the object of the "archaeologist's visits."

In a few years the Indians will be dead, and as the young are more interested in wheat crops, threshing, and other modern things, the old customs, consequently if motion picture records of these are not soon taken the chance will be gone forever.

Visits Interesting Places

Mr. Jenness, of the Department of Anthropology, Ottawa, Returns His Experiences

Diamond Jenness, Chief of the Department of Anthropology, of the National Museum of Canada, who recently returned from the Fourth Pacific Scientific Expedition to the Northwest Territories, has been in the Northwest Territories, where he represented the Canadian Government, gave an account of his experiences.

Mr. Jenness, who is the impression of that interesting country at the weekly meeting of the Gyro Club, held at the Duffell, Ottawa.

Mr. Jenness has been known for his studies of the Eskimo, commenced when he was ethnologist of the Canadian Arctic Expedition from 1913 to 1918. Several reports by him on this subject have been issued by the Canadian Government.

Eat For Health and Enjoyment On Christmas

Appetite, Digestion and Good Health

Will Put Following Menu

While Christmas is recognized as a day of feasting and its celebration would not be considered complete without a bountiful repast, the choice of the viands that compose the holiday menu has not always been wise.

To eat well on December 25th, is excellent, but to suffer from a bilious attack on December 26th, is not.

Through knowledge of food and combinations we now have a meal which is perfect in its content and amount, and satisfying to the most fastidious. Here, compiled by Mary A. Butcher, well known American dietitian, are two menus that will serve alike health and appetite.

LIBERAL COST MENU
Tomato Soufflé
Olive, Celery, Toast Slices
Roast Turkey, Children or Duck
Sweet Potatoes, Dressing
Buttered Cauliflower

Whole Wheat Rolls, Butter
White Salad, Crackers
Tangerines for Dessert
Coffee, Cream, Sugar
(Milk for Children)

LOW COST MENU
Cream of Celery Soup
Crackers
Mock Duck
Mashed Potatoes, Gravy
Chopped Chabbage
Whole Wheat Bread, Butter
Carrot and Celery Salad
Tapioca Cream with Apples
Sugar, Coffee, Milk
(Milk for Children)

Lighthearted Meal in World
Lithium, formerly rare, is now produced in Ton Lake

Production by the ton of a metal that floats like cork on water, the latest achievement of U.S. metal manufacturing, was revealed at the New York Electrical Society meeting by Dr. W. C. MacFarlane, professor of chemistry at New York University.

The substance is lithium, the world's lightest metal, silvery in color, softer than lead, one half the weight of water, and such a ready mixer with other metals that its use has led from aviation to sweetener-cakes.

Although recently produced commercially in lithium still is rare that chemical catalogues at New York University quote it at \$240 pound.

The achievement is a quantity of production method, completed barely a month ago, making it for about \$15 a pound whole and in ten lots.

The big field of lithium is in alloys in the form of steel-making. It loses its softness when increased with the power of helium gas by about 15 per cent. by one of its peculiarities, lithium is a rapid absorber of gaseous impurities.

Mr. Paster: It was a good idea one to get to close out the month. But why did you pick out a tomato?

His Wife: Why, I thought a female eat would be afraid of mine.

The state department has been instructed by President Hoover to invite all foreign governments to participate in the world's fair, to be held in Chicago in 1933.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Madras, in India, is one of the world's hottest cities, its highest point being only 22 feet above sea level.

The sea goes much salt from volcanoes, which discharge hydrochloric acid, one scientist concludes.

FAINT, DIZZY SPELLS
Had To Sleep
Propped Up In Bed

Mr. Norman Bishop, Salisbury, N.H., writes: "I was troubled with faint and dizzy spells, and when I got to sleep I would suffer terribly with another spell. I got so bad I had to sleep propped up in bed."

"My doctor said it was my heart and that I had a good heart tonic."

"It was advised to take MILBURN'S HEART NERVE PILLS."

I had not taken one but when I could do so and sleep like a child. I took a box of 10 pills and I am well and feel like a new man."

Aluminum remained a curiosity of no particular usefulness for almost 20 years after it was first produced.

Good for Toothache—Minard's Liniment.

Facing Many Dangers

Toronto Professor Going To Abyssinia To Photograph Script of Old Testament

Jealously guarded by monks for more than 2,500 years, Ethiopia translations of the Old Testament are called R. A. M. Mercer from his chair in Oriental Languages and Cryptology at Trinity College, University of Toronto, to leave the dangers of Abyssinia. He will photograph the manuscript and return to the calm of variety clotters to use his prints of the ancient writing to enhance the world's knowledge of holy writ.

It was in the fourth century B.C. that the Old Testament was translated into Ethiopic, the ancient language of Abyssinia, and no European has ever glimpsed the manuscript, hidden in cloister monasteries as the monks' most valuable possession.

"I have conceived the notion of preparing a copy of the Coptic script from photographs of the oldest manuscripts, one first," said Professor Mercer today. "While manuscripts of the Old Testament exist in Europe, they are comparatively recent dates and many errors have crept into them. In study of the Old Testament use is now made of practically every language into which it has been translated except Ethiopic."

It is to supply this link in the chain of biblical history that Professor Mercer will travel without white companions through hundreds of miles of untracked African desert. "It will be terribly hard, of course," he admitted, "but I think it is a work that should be done."

In 1918 the seavast was responsible for certain Abyssinian translations which brought him into touch with the Abay, patriarch of the Abyssinian church. Upon the goodwill then built the adventurer stakes his bid to the world in entering the monasteries and on his journey he will be guarded by native soldiers from attacks of hostile savages.

Professor Mercer sailed from New York on December 17, and will enter the second stage of his journey from Maroules to North Africa on January 24. He carries a specially designed camera.

Will Aid Fire Fighters
Carrier Pigeons Will Be Used In Northern Manitoba

Carrier pigeons will aid next year in the battle against the forest fires that set up disturbances detrimental to the health of the province. They will be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders, which will destroy the worms and correct the conditions that were favorable to their existence.

Carrier pigeons will aid next year in the battle against the forest fires that set up disturbances detrimental to the health of the province. They will be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders, which will destroy the worms and correct the conditions that were favorable to their existence.

Little Helps For This Week

"For all that is in the heaven and the earth is Thine."—1 Chronicles xix.

There shall never be one lost good! What was made shall live as before: The evil is null, is nothing, is silence implying sound.

What was good shall be good, with, for evil, so much good more. On the earth the broken are: In heaven the perfect round.

—Robert Browning.
No good that has been truly made, though in the midst of mistakes, shall, in any upshot of life, be utterly lost. In the end of things the angels shall always come and gather the wheat from among the tares.—Adeline D. T. Whitney.

No good deed, no genuine sacrifice, no battle if there be the forest fire, God will use it for His own holy purpose; and whatever of ignorance, or weakness, or mistake was mingled with it will drop away, and the victorious seeds drop away when the full flower has blown.

—Frederic W. Farrar.
Worms, however generated, are the battle against the forest fire, they set up disturbances detrimental to the health of the province. They will be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders, which will destroy the worms and correct the conditions that were favorable to their existence.

IN LOVING MEMORY

Too far away your grave to see,
But not too far to remember thee
In loving memory of Joseph
Gordon Dutton. Inserted by
Grandma, Grandad, Uncles and
Aunts.

Quietly and quickly came the call
His sudden death surprised us all
It is only those who have loved
can tell,
The loss of one they loved so well
In loving memory of our dear
baby. Inserted by Mother and
Daddy.

BIRTHS

McKay—In Redcliff, on Fri-
day, Jan. 24th, 1930, to Mr. and
Mrs. Ross McKay, a daughter.

HULLAND—In Redcliff, on
Sunday, Feb. 2nd, 1930, to Mr.
and Mrs. John Hulland, of East
Springs, a son.

Easy! Quick! Glycerin Mix For Constipation

Simple glycerine, buckthorn
bark, saline, etc., as mixed in
Adlerka, relieves constipation
in TWO hours! Most medicines
act on only lower bowel, but
Adlerka acts on BOTH upper
and lower bowels, removing poi-
sons you never thought were in
your system. Just ONE spoon-
ful relieves GAS, sour stomach
and sick headache. Let Adlerka
give stomach and bowels a
REAL cleaning and see how
good you feel. Cecil T. Hall

Warning

The following section is taken
from the Criminal Code, chapter
73:—"Every one is guilty of a
offence and liable on summary
conviction in the case of a first
offence to a penalty not exceed-
ing ten dollars, and in the case of
a second offence to a penalty not
exceeding, twenty-five dollars,
and in the case of a third or sub-
sequent offence to a penalty
not exceeding one hundred dollars,
who, directly or indirectly, sell,
or deliver or furnishes to a person
under the age of sixteen years,
any cigarettes or cigarette paper,
whether for his own use or not,
or sells or gives or furnishes to
such a person tobacco in any
form other than cigarette
which tobacco he knows or has
reason to believe is for the use
of that person

Your Vote and Influence Solicited

As I have entered the field to run for Councillor, I
solicit your Vote and Influence. If elected I will en-
deavor to assist in having the Town's Affairs run as
economically and as efficiently as possible, with equal
rights to all and special privileges to none.

Yours Sincerely

H. M. SANGSTER

Your Vote Solicited For Councillor

Since I have accepted the nomination to run for
the Town Council, I ask for the support of the rate-
payers in the election next Monday. If elected I will
do my utmost to advance to the interests of the
ratepayers in helping to make Redcliff a bigger and
better town in all lines of activities, with efficiency
and economy as the watch word.

Yours Sincerely

A. E. SHAW

Colors and good patterns to clear at a yard ... 25c

THE HICKS TRADING CO.

Vote For Brydle

In my opinion the next two years will be among
the most important in the town's history. Several
things need re-adjusting and it is only because I feel
that my past experience of eight years on the council
qualifies me for dealing with these matters to the ad-
vantage of the ratepayers, that I again enter the con-
test. In your own interest, therefore, I ask for your
support, vote and influence next Monday.

Yours truly, A. BRYDLE

Experience Counts In Town Affairs

And I feel my past experience of eight years on the
council, places me in the position to be of more service
than ever to the ratepayers, in dealing with several im-
portant matters which must come before the council
for settlement during the next two years. I therefore
feel that you will be best serving your own interests by
casting your vote next Monday for Yours truly
